

Kaltura Personal Capture

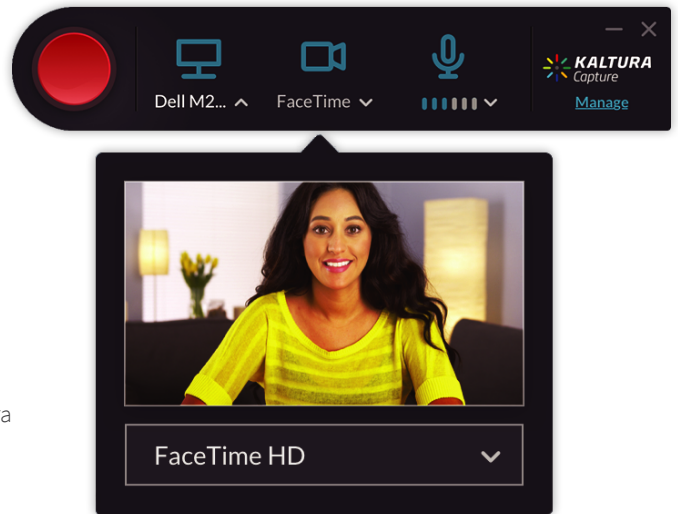

Get Started Admin Guide

Introduction

With Kaltura Personal Capture desktop recorder everyone is a creator! Kaltura Personal Capture is our native client for easy video capture. No complex setup or lengthy learning curves required. Simply click record and start creating. Features include:

- Screen and webcam capture in one click
- Easily search and discover content with automatic slide detection
- Support for both user level install and centralized deployment via software management solutions
- Automatic uploading to Learning and Content Management Systems and Kaltura MediaSpace
- Intuitive user interface
- Supported on both Windows and Mac

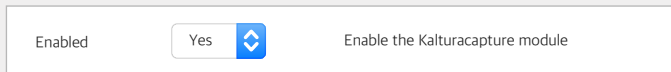

This quick guide is intended for KMS and KAF administrators. In this guide we will walk you through how to enable the Kaltura Personal Capture module on your environment.

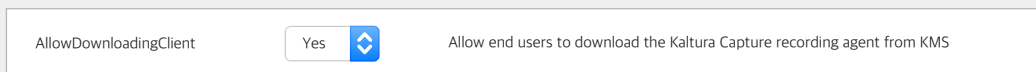

Enabling Kaltura Personal Capture

To enable Kaltura Personal Capture, follow these steps:

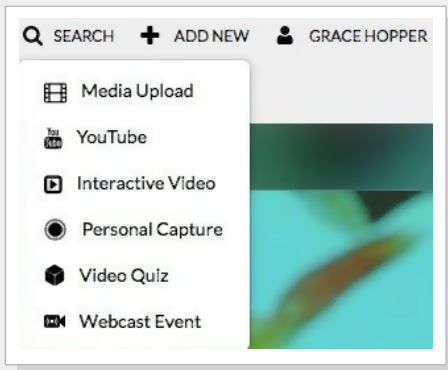

- 1 Login to Kaltura MediaSpace or the KAF Admin Console and go to the Configuration Management window.
- 2 Login to your KMS or KAF admin, by accessing [http\(s\)://<your KMS or KAF URL>/admin](http(s)://<your KMS or KAF URL>/admin). Identify the Kalturacapture module in the navigation pane on the left and click to select it.
- 3 Select Yes to enable the module.

- 4 The setting for AllowDownloadingClient enables users to download Kaltura Personal Capture client for installation from the KMS/KAF website. Click Yes to enable users to download and install the client. Admins choosing to deploy Kaltura Personal Capture using a software management solution may turn this setting to No.

- 5 In the AddNewLabel field, enter the label you would like users to see when launching Kaltura Personal Capture from the Add New menu.

AddNewLabel Add new Kaltura Capture lable

- 6 Under AllowedRoles, you can choose who will have access to Kaltura Personal Capture. You can choose based on role: admin, unmoderated admin, or private only. You can also choose to enable Kaltura Personal Capture for specific users under allowedUsers. See the [Kaltura Personal Capture Deployment Guide](#) for recommendations on rolling out Kaltura Personal Capture to the entire organization.

AllowedRoles

- Specific Users
- PrivateOnly Role
- Admin Role
- UnmoderatedAdmin Role

Who can create Kaltura Capure? If a role is selected, any role above it will also be able to create Kaltura Capture.

AllowedUsers

Select users who are allowed to create Kaltura Capture. Selected users must be of PrivateOnly role or above

1

User

- 7 Set the entryURL. This URL will be shown to end users at the end of each recording. If you're using KMS, leave this field empty. If you're using KAF, make sure to enter the URL that points to each user's 'My Media' page.

EntryURL What url to show the user after the captured media is uploaded. Leave blank for KMS base url

- 8 Click Save

Now that the module is enabled your users will be able to download Kaltura Personal Capture, install the application and start recording. See our [Get Started User Guide](#) or the [Kaltura Personal Capture User Guide](#) for more information.
