

KALTURA

KALTURA K-12 MEDIA SUITE

Redefining the Education Experience

WHAT IS KALTURA'S K-12 MEDIA SUITE?

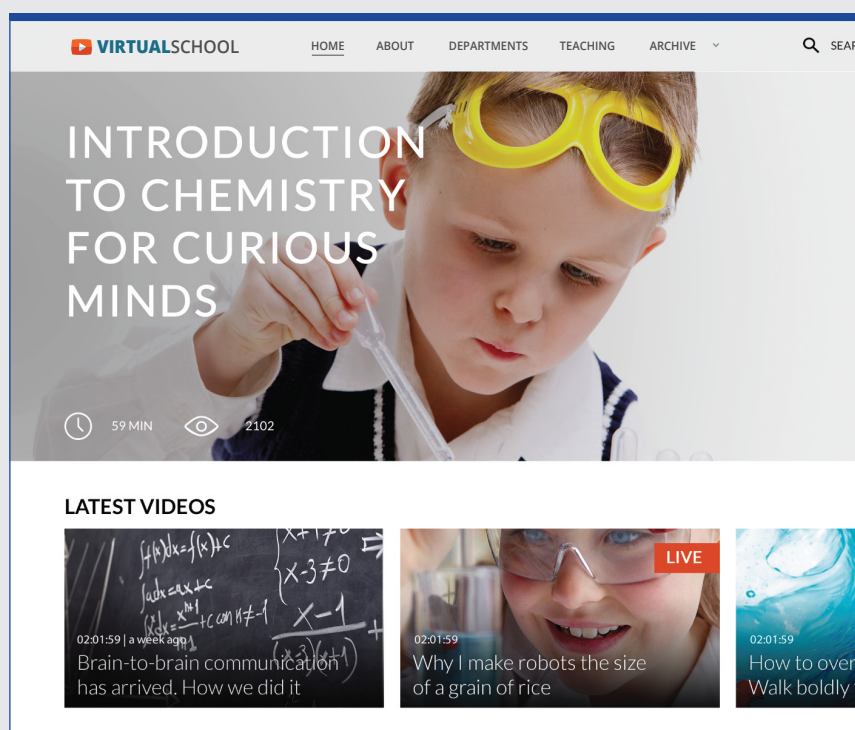

Kaltura lets you create and manage media assets in a centralized ecosystem across your school or district.

Empower your staff, teachers, and students to create, upload, browse, curate, and share video with ease. Enable watching live and on-demand videos, screencasts, video presentations and other rich media content - all within your own branded media portal, LMS, and/or CMS.

With over 650 educational clients including school districts, DOEs, virtual schools, universities/colleges, and individual private schools, Kaltura provides a superb cross device experience, unmatched student, teacher, and parent engagement capabilities, and powerful control and governance tools.

IMAGINE THE POSSIBILITIES

- Enhance student engagement by creating, editing, and uploading media to your own branded Kaltura MediaSpace™, LMS, and/or CMS all within the same environment.
- Enable all students to search, discover, and view video through captioning, transcription, and translation services.
- Better prepare students for Common Core and state assessments by creating prep and instructional videos.
- Understand student and staff engagement through powerful video analytics, and system reports.
- Gain student insight through informative assessment with Interactive Video Quizzing and video analytics.
- Empower teachers to curate, search, share, and re-use pedagogical videos across the school or district.
- Expand Professional Development and PLCs' reach through live streaming and video-on-demand.
- Discover remediation strategies and reading/foreign language fluency through video and audio assets.
- Empower staff and teachers to create searchable, interactive video presentations that can be viewed on any device at any time with Kaltura CaptureSpace™.
- Enhance your one-to-one or BYOD program through video assignments and collaboration.
- Increase parent/community engagement with live and VOD through public/private access with Kaltura MediaSpace.
- Stream-live and video-on-demand (VOD) board meetings, announcements, guest speakers, athletics, and more.

KALTURA MEDIASPACE: A ONE-STOP-SHOP SOLUTION

Our broad platform capabilities include rich media ingestion, transcoding, editing, annotation, metadata and content management, publishing (live or VOD) to web or mobile, syndication, and analytics. In addition to the core platform, Kaltura offers “out of the box” applications that can be deployed instantly, as well as fully customizable software, widgets, and APIs that can be tailored to specific requirements. The platform can support any size deployment – from centrally controlled district-wide, DOE, or virtual school deployments to smaller departmental or school solutions.

KALTURA VIDEO EXTENSIONS
