

Kaltura CaptureSpace™

KALTURA

Presentation Capture Made Easy

Whether in education or enterprise, video-based learning is on the rise. Until now, producing quality teaching videos has been technically difficult, expensive, and painstakingly time-consuming. Kaltura CaptureSpace™ combines painless recording, automated publishing, and interactive viewing to enable easy media capture in class, at the office, at home, or on-the-go.

How It Works

Content creators capture multi-stream recordings of up to three video inputs synchronized with a PowerPoint presentation or screen capture. Viewers can navigate to desired content, search through slide text, switch between video streams, and view picture in picture. CaptureSpace™ makes it simple to create searchable, interactive video that can be viewed on any device at any time.

Key Features

- Captures up to 3 video inputs from any camera connected to the computer
- Automatically generated, editable slides
- Built-in screen annotation tools
- Editing features including trimming, chopping, and adding chapters, titles, and credits
- Integration with automatic caption generation tools, such as Kaltura REACH
- Seamless uploading to LMS and Kaltura MediaSpace™
- Automatic content and metadata ingestion and transcoding for viewing on any device
- Integration with Kaltura Management Console for player configuration, playlists, discovery, and more
- Side-by-side playback of slides and audio/video
- In-video search
- HTML5 content playback

Benefits

- **Easy:** Automatically captures audio, screen or PowerPoint, and video from up to three sources simultaneously, so creators can record in any environment
- **Seamless:** Pre-integrated with MediaSpace™ as well as all leading LMSs for recording, publishing, editing, and viewing within the same environment
- **Interactive:** Provides an easier way for viewers to navigate long videos, search for videos, and switch between presentation and multiple camera angles
- **Consolidated:** Uses Open Capture Standard to ingest content regardless of the software/hardware employed

Presentation Capture and More

Kaltura CaptureSpace™ is the simplest way to turn presentations into video. Presenters can easily combine screen or presentation capture with multiple cameras for example, capturing the presenter, the audience, and a close-up of a black or whiteboard. Alternatively, lectures can be recorded with a simple audio feed over the presentation. But presentation capture is only the beginning. CaptureSpace™ also enables:

Online training

Reduce costs and increase productivity with training videos that only need to be delivered once to ensure uniform, effective, on-demand training for staff

Demonstrations

Create an easily accessible library of flawless lab or product demos that can be watched on-demand

Flipped classrooms

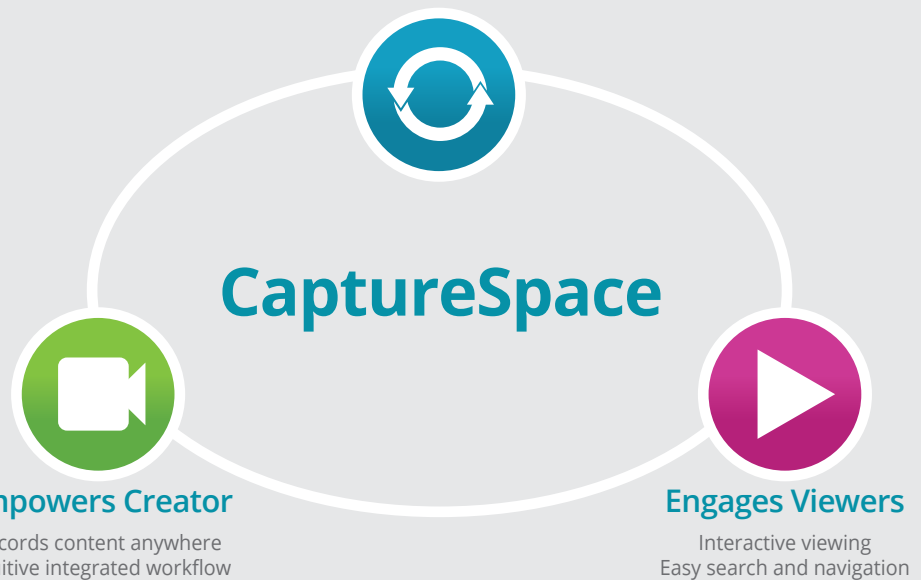

Use classroom time more effectively by pre-recording lectures and presentations so class can be reserved for discussion

Student Presentations

Enable video-based homework and presentations that can be recorded and graded at the convenience of both students and faculty

End-to-End

Seamless recording to viewing
Manages content in one place

Technology and Deployment Options

- Recording capabilities currently available on Windows and Mac
- Viewing supported on any device
- Integrations with Kaltura MediaSpace™, Blackboard, Canvas, Moodle, BrightSpace, Sakai*, Sharepoint 2013, and IBM Connections
