

COLLABORATION

Today's coworkers are less likely than ever to work in the same physical space. Whether spread out across global offices or just working from home, colleagues may never meet in person. But as workflows become ever more complex and interconnected, the need for teamwork is greater than ever. Video helps close the gap. By maintaining the face-to-face quality across oceans, language barriers, even asynchronously, video helps far-flung teams work towards a common goal.

SPEED UP INNOVATION

Connect dispersed offices, mobile teams, and remote workers in real-time to achieve business results faster.

REDUCE TRAVEL EXPENSES

With webcasts, virtual events, and video conferencing, spend less time (and money) on the road while still maintaining quality personal relationships.

CASUAL COLLABORATION

Schedules making it difficult to get everyone at one time for a meeting? Quick desktop capture makes it easier to collaborate across time zones and schedule conflicts. Tap into the collective wisdom of your workforce and increase productivity.

" And the great thing about video is that we can capture the genuine employee voice, share best practices and collaborate in a highly-engaging format. "

*Jonathan Bunn,
Head of Communications, MetLife EMEA*

INCREASE TRANSPARENCY

Reduce the duplication of work by connecting your project teams and making strategies more visible to others.

SOCIAL VIDEO

By making videos easy to search for, share, like, and comment on, a social video portal gets people talking and brainstorming.

REWARD GREAT IDEAS

Recognize your employees by keeping track of your top idea generators and participants.
